

## **Product Specifications**

Product number:	HBcr-3000
Description:	Hepatitis B core Recombinant Antigen
Amount:	1 mg
Physical state:	Frozen liquid solution, buffered with 0.02M Potassium Phosphate, 0.3M Potassium Chloride, 5mM L-Leucine, pH 6.8
Manufacturing method:	Recombinant Hepatitis B core antigen isolated from E. coli and purified by chromatographic methodologies.
Storage conditions:	Product unstable above $0^{\circ}$ C, aliquot and store frozen at -70±10° C. Avoid repeated freeze-thaw.
Instructions for use:	Recommended for use in standard solid phase immunoassays.
Warnings:	For research or further manufacturing use only.

This product meets or surpasses ImmunoVision's specifications.
