

## **Product Specifications**

<b>Product number:</b>	<i>HBer-3000</i>
<b>Description:</b>	<i>Hepatitis B e Recombinant Antigen</i>
<b>Amount:</b>	<i>1 mg</i>
<b>Physical state:</b>	<i>Frozen liquid solution, buffered with 0.05M Phosphate, 0.15M Sodium Chloride, pH 7.4</i>
<b>Manufacturing method:</b>	<i>Recombinant Hepatitis B e antigen isolated from E. coli and purified by chromatographic methodologies.</i>
<b>Storage conditions:</b>	<i>Product unstable above 0° C, aliquot and store frozen at -70 ± 10° C. Avoid repeated freeze-thaw.</i>
<b>Instructions for use:</b>	<i>Recommended for use in standard solid phase immunoassays.</i>
<b>Warnings:</b>	<i>For research or further manufacturing use only.</i>

*This product meets or surpasses ImmunoVision's specifications.*
