

## **Product Specifications**

<b>Product number:</b>	<i>RTE-1000</i>
<b>Description:</b>	<i>Rabbit thymus extract. Precipitates antisera to SSB (La), Scl-70, Sm, RNP, and Jo-1.</i>
<b>Amount:</b>	<i>0.5 ml</i>
<b>Physical state:</b>	<i>Lyophilized. Buffered with 0.01M phosphate in saline.</i>
<b>Manufacturing method:</b>	<i>Rabbit thymus is extracted in phosphate buffered saline. Insoluble material is removed. Extractable nuclear antigens are lyophilized.</i>
<b>Storage conditions:</b>	<i>Store at <math>\leq -40^{\circ}\text{C}</math>. Aliquot and store reconstituted extract, do not subject to repeated freeze-thaw.</i>
<b>Instructions for use:</b>	<i>Reconstitute with 0.5 ml cold distilled water. Allow 30 min. for complete dissolution. Some assay systems may require more concentrated or more dilute extract. Some precipitate may occur, but it will not affect the product.</i>
<b>Warnings:</b>	<i>For research or further manufacturing use only.</i>
